# ABOUT **US**

## **Hi, We are Ascend Creatives**

Starting a graphic design startup is an exciting venture that allows you to leverage creativity and design expertise to meet market needs. A design startup typically focuses on delivering high-quality visual solutions, and like any business, it requires careful planning, branding, and a strategy for attracting and retaining clients

Graphic Design

3D Modelling

Vfx Editing

**SKILLS**

# PORT FOLIO DESIGNING

# GRAPHIC DESIGN

Graphic design is the art and practice of using visual elements—such as typography, images, colors, and layout—to communicate messages effectively. It combines creativity with technical skills to create visually appealing and functional designs for different media, including print, digital, and multimedia platforms.

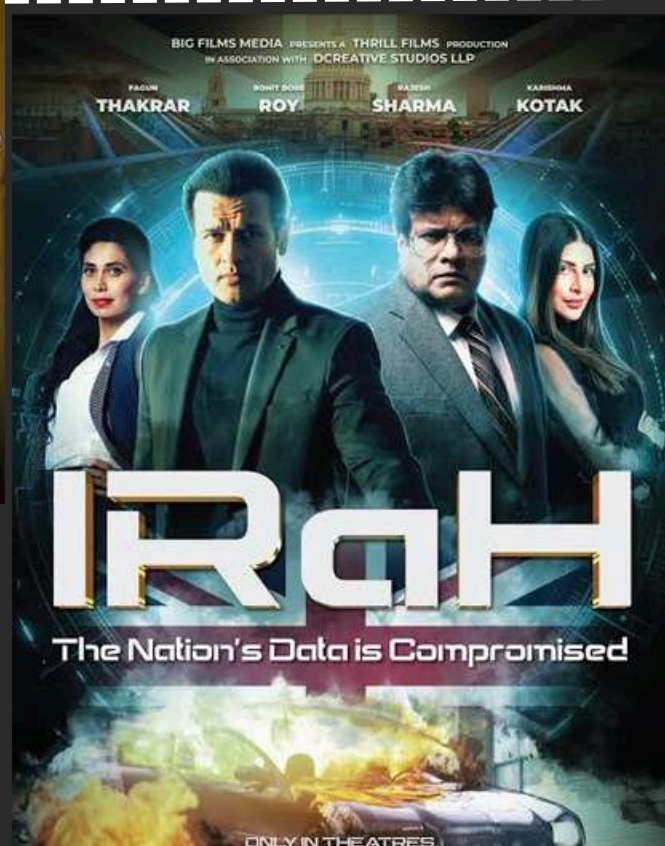

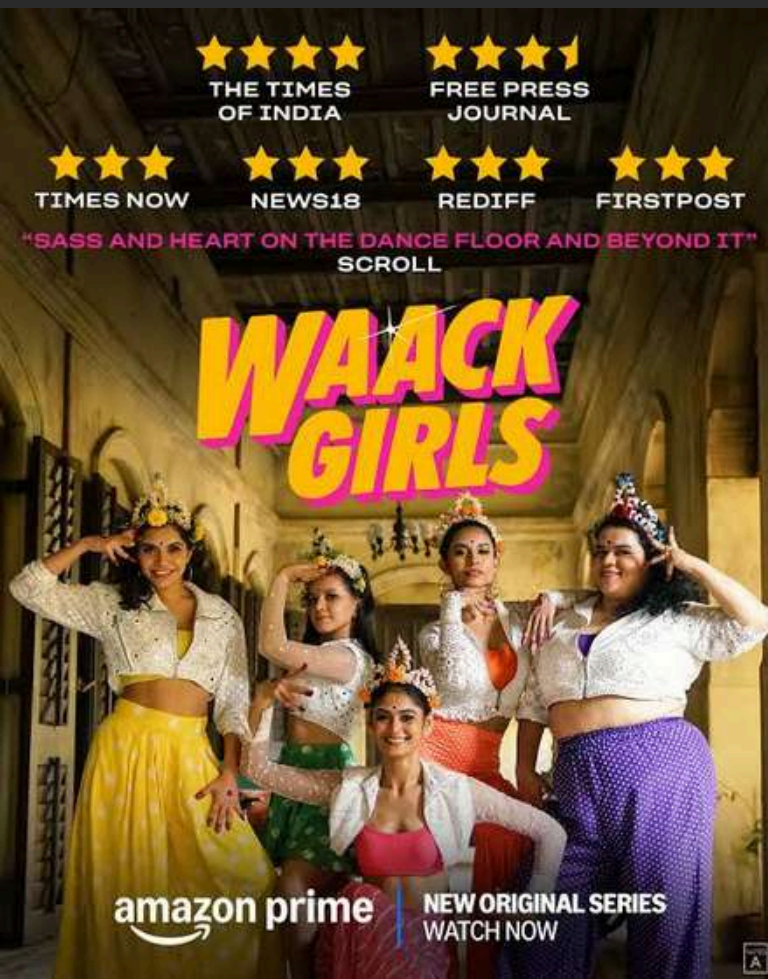

# VFX EDITING

VFX (Visual Effects) editing involves the integration of digitally created elements, like animations, simulations, and 3D models, into live-action footage to create realistic or imaginative visual elements that cannot be captured on camera. It's commonly used in movies, TV shows, video games, and advertisements.
